Chapter Four System Testing	35
System Test Case (STC-01): Doctors can view a doctor home page on the web application.	35
System Test Case (STC-02): Doctors can create patient's profiles on the web application application by inputting personal id, name, surname, prescription or username.	37
System Test Case (STC-03): Doctors can update patient's profiles on the web application application by inputting personal id, name, surname, prescription and username.	42
System Test Case (STC-04): Doctors can delete patient's profiles on the web application.	47
System Test Case (STC-05): Doctors can search patient's profiles on the web application by using personal id, name or surname.	50
System Test Case (STC-06): Doctors can view patient's profiles on the web application.	54
System Test Case (STC-07): Doctors can view a list of patient's profiles on the web application.	56
System Test Case (STC-08): Administrators can view an admin home page on the web application.	58
System Test Case (STC-09): Administrators can add user's profiles on the web application by inputting name, surname, username, password, confirm-password and position.	59
System Test Case (STC-10): Administrators can update user's profiles on the web application by inputting name, surname, username, password, confirm-password and position.	64
System Test Case (STC-11): Administrators can delete user's profiles on the web application.	69
System Test Case (STC-12): Administrations can search user's profiles on the web application by using name, surname or username.	72
System Test Case (STC-13): Administrations can view user's profiles on the web application.	76
System Test Case (STC-14): Administrations can view a list of user's profiles on the web application.	77
System Test Case (STC-15): Doctors, Administrations, and FDAs can login to the web application.	79
System Test Case (STC-16): Doctors, Administrations, and FDAs can logout from the web application.	82
System Test Case (STC-17): Doctors can create allergy report on the web application by inputting personal id, name, surname, and allergy drug.	83
System Test Case (STC-18): Doctors can update an allergy report on the web application by inputting personal id, name, surname, and allergy drug.	87
System Test Case (STC-19): Doctors can delete an allergy report on the web application.	91
System Test Case (STC-20): Doctors can search allergy reports on the web application by using personal id, name or surname.	94
System Test Case (STC-21): Doctors can view an allergy report on the web application.	98
System Test Case (STC-22): Doctors can view list of allergy reports on the web application.	100
System Test Case (STC-23): FDAs can view a FDA home page on the web application.	102
System Test Case (STC-24): FDAs can view an allergy report on the web application.	103
System Test Case (STC-25): FDAs can view list of allergy reports on the web application.	105
System Test Case (STC-26): Patients can login to the mobile application by using username and password.	107
System Test Case (STC-27): Patients can logout from the mobile application.	109
System Test Case (STC-28): Patients can view the QR code on the mobile application.	111
System Test Case (STC-29): Pharmacists can scan the QR code on the mobile application.	112
System Test Case (STC-30): Pharmacists can add the time of dispensation to patient's profile on the mobile application.	115

Chapter One | Introduction

1.1 Objectives

The objective of the Software Design Document for “Smart prescription application” both Android mobile application and web application are to provide a description and explain of the design system including activity following requirements specification and before programming. This document is based on the project proposal, project plan and software requirement specification and help developers to understand how to work for this application.

1.2 Scope

Smart prescription application consists of a web application and a mobile application. Smart prescription application requires a web application for creating a patient’s profile and allergy report by a doctor and the Smart prescription application require a mobile application to generate and scan the QR code on a mobile phone by a pharmacist.

The features of the web application consist of:

Feature#1: Prescription system

Feature#2: Account management system

Feature#3: Authentication system

Feature#5: Report allergy system

Feature#6: Allergy drug summary report system

The features of the mobile application consist of:

Feature#4: Prescription verification system

1.3 Acronyms and Definitions

1.3.1 Acronyms

UTC	Unit Test Case
STC	System Test Case
SRS	Software Requirement Specification
URS	User Requirement Specification
SDD	Software Design Document
UI	User Interface

1.3.2 Definitions

Feature	Transformation of input parameters to output parameters based on a specified algorithm. It describes the functionality of a product in the language of the product. Used for requirements analysis, design, coding, testing or maintenance.
Unit test	A unit of work is a single logical functional use case in the system that can be invoked by some public interface (in most cases). A unit of work can span a single method, a whole class or multiple classes working together to achieve one single logical purpose that can be verified. [1]

Document Name	Smart Prescription Application_Test Plan	Owner	Natthakan Kaeokanpai, Phithiwat Sitthitun	Page	5
Document Type	Test Plan	Release Date	July 30 th , 2016	Print Date	July 30 th , 2016

Chapter Two | Test Plan and Test Procedure

2.1 Test Objectives

The objectives of testing “Smart Prescription Application” application are:

- To detect and fix all bugs and defects.
- To cover all requirements that is functional, non-function, or user interface-related.
- To gain the acceptance and approval of the stakeholders in the test effort.
- To direct, guide and constrain the test effort, focusing the work on the useful and necessary deliverables.

2.2 Scope of Testing

“Smart Prescription Application” application will be tested using both white-box testing technique (i.e. unit testing) and black-box testing technique (i.e. system testing). The test results will be documented in the Test Record.

2.3 Test Duration

Date
Perform date: July, 16 th 2016
Duration: July, 30 th 2016

2.4 Test Responsibility

Item	Responsibility
Unit test of “Smart Prescription Application” web application	Natthakan Kaeokanpai, Phithiwat Sitthitun
System test of “Smart Prescription Application” web application	Natthakan Kaeokanpai, Phithiwat Sitthitun
Unit test of “Smart Prescription Application” mobile application	Natthakan Kaeokanpai, Phithiwat Sitthitun
System test of “Smart Prescription Application” mobile application	Natthakan Kaeokanpai, Phithiwat Sitthitun

2.5 Test Strategy

“Smart Prescription Application” application testing is performed in following steps:

- Design test case for each feature.
- Prepare test data for each feature.
- Determine expected results.
- Perform testing on individual features.
- Record testing result.
- Store all test files in the project repository.

Document Name	Smart Prescription Application_Test Plan	Owner	Natthakan Kaeokanpai, Phithiwat Sitthitun	Page	6
Document Type	Test Plan	Release Date	July 30 th , 2016	Print Date	July 30 th , 2016

2.6 Result of Testing

All the test results will be documented in the Test Record and separated into two parts, which are:

1. Actual output: The actual output that is produced by each test case.
2. Test Pass/Fail criteria:
 - 2.1 Test Pass: The actual result is same as expected result.
 - 2.2 Test Fail: The actual result is not same as expected result.

2.7 Test Environment

2.7.1 Hardware

- Internet

- Laptops

1. Dell inspiron 5220
Processor: Intel Core i5 3210M (3.1 GHz)
Processor Memory: 8GB DDR3
Memory Hard Disk: 1000GB
Operating System: Window 7 Home Basic
2. Asus X550DP-DS101
AMD A-Series A10-5750M (2.50GHz) 8GB
Memory 1TB
HDD AMD Radeon
Windows 8 64-Bit

- Mobile phone: Android Operating System with camera

1. Asus zenfone 4.5
Android 4.4.2 (KitKat)
Processor: Intel Atom Z2520DualCore
CPU Speed: 1.2 GHz
Memory 8GB (Internal)
RAM 1GB
2. Samsung galaxy J7
OS: Android OS, v5.1 (Lollipop)
Processor: Quad-core 1.4 GHz Cortex-A53 & quad-core 1.0 GHz Cortex-A53
Octa-core 1.5 GHz Memories 16 GB, 1.5 GB RAM 8GB (Internal)

2.7.2 Software

1. Php Storm 8.3
2. Google Chrome
3. Android studio 2.1
4. Visual paradigm
5. Xampp

Document Name	Smart Prescription Application_Test Plan	Owner	Natthakan Kaeokanpai, Phithiwat Sitthitun	Page	7
Document Type	Test Plan	Release Date	July 30 th , 2016	Print Date	July 30 th , 2016

Chapter Three | Unit Testing

3.1 Class SiteController

3.1.1 Unit Test Case (UTC-01): login(String username, String password) : Boolean

Description: Test login(String username, String password) method for checking username and password that are exist in the user table.

Prerequisites or Test input: The test data is available at Appendix A.

Test cases:

Test case ID	Description	Input	Expected Result
1	Test method by input username and password are exist in the user table.	username = "admin" password = "admin"	True
2	Test method by input username and password do not exist in the user table.	username = "admin12" password = "admin12"	False
3	Test method by input only username is exist in the user table.	username = "admin" password = "admin12"	False
4	Test method by input only password is exist in the user table.	username = "admin12" password = "admin"	False
5	Test method by input username without password.	username = "admin" password = Null	False
6	Test method by input password without username.	username = Null password = "admin"	False

3.1.2 Unit Test Case (UTC-02): logout() : Boolean

Description: Test logout() method for checking web application can action to log out the current user.

Prerequisites or Test input: The test data is available at Appendix A.

Test cases:

Test case ID	Description	Input	Expected Result
1	Test logout is active when logout() is invoked.	-	True

Document Name	Smart Prescription Application_Test Plan	Owner	Natthakan Kaeokanpai, Phithiwat Sitthitun	Page	8
Document Type	Test Plan	Release Date	July 30 th , 2016	Print Date	July 30 th , 2016

3.2 Class UserController

3.2.1 Unit Test Case (UTC-03): getUserList() : ArrayList

Description: Test getUserList() method for checking whether the method get right list of user on the web application. The expected result will be arraylist of user.

Prerequisites or Test input: The test data is available at Appendix A.

Test cases:

Test case ID	Description	Input	Expected Result
1	The method should return the right arraylist of user from the database.	-	<pre>ArrayList<User>{ User{ id = 15, name = "Phithiwat", surname = "Sitthitun", username = "phithi", password = "1234", pssword2 = "1234", roleId = 1 } User{ id = 2, name = "Natthakan", surname = "Kaeokanpai", username = "natthakan", password = "man", password2 = "man", roleId = 2 } User{ id = 3, name = "Tony", surname = "Stark", username = "tony", password = "tony", password2 = "tony", roleId = 3 } }</pre>

Document Name	Smart Prescription Application_Test Plan	Owner	Natthakan Kaeokanpai, Phithiwat Sitthitun	Page	9
Document Type	Test Plan	Release Date	July 30 th , 2016	Print Date	July 30 th , 2016

3.2.2 Unit Test Case (UTC-04): viewUser(Int userId) : Mixed

Description: Test viewUser(Int userId) method for checking whether the method get right user model object related to user id. The expected result will be user model object.

Prerequisites or Test input: The test data is available at Appendix A.

Test cases:

Test case ID	Description	Input	Expected Result
1	Test method by input user id that exist in the databse. The method should return the right user object related to user id.	userId = 15	User{ id = 15, name = "Phithiwat", surname = "Sithhitun", username = "phithi", password = "1234", pssword2 = "1234", roleId = 1 }
2	Test method by input user id that not exist in the database	userId = 99	False
3	Test method by not input user id.	Null	False
4	Test method by input user id with string value.	userId = "phithiwat"	False

3.2.3 Unit Test Case (UTC-05): createUser(User user) : Boolean

Description: Test createUser(User user) method for checking whether the method add the right data into the database. The data is includes name, surname, username, password, password2 and roleId.

Prerequisites or Test input: The test data is available at Appendix A.

Test cases:

Test case ID	Description	Input	Expected Result
1	Test method by input new data.	User{ name = "Steve", surname = "Rogers", username = "steve", password = "1234", password2 = "1234", roleId = 1 }	True
2	Test method by input the data that already exist. (username)	User{ name = "Tony", surname = "Stark", username = "steve", password = "tony", password2 = "tony", roleId = 2 }	False

Document Name	Smart Prescription Application_Test Plan	Owner	Natthakan Kaeokanpai, Phithiwat Sithhitun	Page	10
Document Type	Test Plan	Release Date	July 30 th , 2016	Print Date	July 30 th , 2016

3	Test method by input without name.	User{ name = Null, surname = "Rogers", username = "steve", password = "1234", password2 = "1234", roleId = 1 }	False
4	Test method by input without surname.	User{ name = "Steve", surname = Null, username = "steve", password = "1234", password2 = "1234", roleId = 1 }	False
5	Test method by input without username.	User{ name = "Steve", surname = "Rogers", username = Null, password = "1234", password2 = "1234", roleId = 1 }	False
6	Test method by input without password.	User{ name = "Steve", surname = "Rogers", username = "steve", password = Null, password2 = "1234", roleId = 1 }	False
7	Test method by input without password2.	User{ name = "Steve", surname = "Rogers", username = "steve", password = "1234", password2 = Null, roleId = 1 }	False
8	Test method by input without roleId.	User{ name = "Steve", surname = "Rogers", username = "steve", password = "1234", password2 = "1234", roleId = Null }	False

Document Name	Smart Prescription Application_Test Plan	Owner	Natthakan Kaeokanpai, Phithiwat Sitthitun	Page	11
Document Type	Test Plan	Release Date	July 30 th , 2016	Print Date	July 30 th , 2016

9	Test method by input string.	“test”	False
10	Test method by input empty string.	“”	False
11	Test method by input an integer.	00	False
12	Test method by nothing input data.	Null	False

3.2.4 Unit Test Case (UTC-06): updateUser(User user) : Boolean

Description: Test createUser(User user) method for checking whether the method update the right data into the database. The data is includes name, surname, username, password, password2 and roleId.

Prerequisites or Test input: The test data is available at Appendix A.

Test cases:

Test case ID	Description	Input	Expected Result
1	Test method by input new data.	User{ name = “Steve”, surname = “Rogers”, username = “steve”, password = “rogers”, password2 = “rogers”, roleId = 2 }	True
2	Test method by input the new data that already exist. (username)	User{ name = “Steve”, surname = “Rogers”, username = “phithi”, password = “rogers”, password2 = “rogers”, roleId = 2 }	False
3	Test method by input without name.	User{ name = Null, surname = “Rogers”, username = “steve”, password = “rogers”, password2 = “rogers”, roleId = 2 }	False
4	Test method by input without surname.	User{ name = “Steve”, surname = Null, username = “steve”, password = “rogers”, password2 = “rogers”, roleId = 2 }	False

Document Name	Smart Prescription Application_Test Plan	Owner	Natthakan Kaeokanpai, Phithiwat Sitthitun	Page	12
Document Type	Test Plan	Release Date	July 30 th , 2016	Print Date	July 30 th , 2016

5	Test method by input without username.	User{ name = "Steve", surname = "Rogers", username = Null, password = "rogers", password2 = "rogers", roleId = 2 }	False
6	Test method by input without password.	User{ name = "Steve", surname = "Rogers", username = "steve", password = Null, password2 = "rogers", roleId = 2 }	False
7	Test method by input without password2.	User{ name = "Steve", surname = "Rogers", username = "steve", password = "rogers", password2 = Null, roleId = 2 }	False
8	Test method by input without roleId.	User{ name = "Steve", surname = "Rogers", username = "steve", password = "rogers", password2 = "rogers", roleId = Null }	False
9	Test method by input string.	"test"	False
10	Test method by input empty string.	""	False
11	Test method by input an integer.	00	False
12	Test method by nothing input data.	Null	False

3.2.5 Unit Test Case (UTC-07): deleteUser(Int userId) : Boolean

Description: Test deleteUser(Int userId) method for checking whether the method delete the user from the database.

Prerequisites or Test input: The test data is available at Appendix A.

Test cases:

Test case ID	Description	Input	Expected Result
1	Test method by input use id that exist in the databasw.	userId = 15	True
2	Test method by input user id that not exist in the database.	userId = 99	False

Document Name	Smart Prescription Application_Test Plan	Owner	Natthakan Kaeokanpai, Phithiwat Sitthitun	Page	13
Document Type	Test Plan	Release Date	July 30 th , 2016	Print Date	July 30 th , 2016

3.2.6 Unit Test Case (UTC-08): searchUser(String users) : ArrayList

Description: Test searchUser(String users) method for checking whether the method can search the user from the user table in the database by using name, surname or username. The expected result will be arraylist of user.

Prerequisites or Test input: The test data is available at Appendix A.

Test cases:

Test case ID	Description	Input	Expected Result
1	Test method by input name that exist in the user table.	users = "Phithiwat"	ArrayList<User>{ User{ id = 15 name = "Phithiwat", surname = "Sithhitun", username = "phithi", password = "1234", pssword2 = "1234", roleId = 1 } }
2	Test method by input surname that exist in the user table	users = "Stark"	ArrayList<User>{ User{ id = 3 name = "Tony", surname = "Stark", username = "tony", password = "tony", password2 = "tony", roleId = 3 } }
3	Test method by input username that exist in the user table.	users = "natthakan"	ArrayList<User>{ User{ id = 2 name = "Natthakan", surname = "Kaeokanpai", username = "natthakan", password = "man", password2 = "man", roleId = 2 } }
4	Test method by input empty data.	users = ""	ArrayList<User>{ User{ id = 15, name = "Phithiwat", surname = "Sithhitun", username = "phithi", password = "1234", pssword2 = "1234", }

Document Name	Smart Prescription Application_Test Plan	Owner	Natthakan Kaeokanpai, Phithiwat Sithhitun	Page	14
Document Type	Test Plan	Release Date	July 30 th , 2016	Print Date	July 30 th , 2016

			<pre> roleId = 1 } User{ id = 2, name = "Natthakan", surname = "Kaeokanpai", username = "natthakan", password = "man", password2 = "man", roleId = 2 } User{ id = 3, name = "Tony", surname = "Stark", username = "tony", password = "tony", password2 = "tony", roleId = 3 } } </pre>
5	Test method by input data does not exist in the user table.	users = "abcdefg"	Null

Document Name	Smart Prescription Application_Test Plan	Owner	Natthakan Kaeokanpai, Phithiwat Sitthitun	Page	15
Document Type	Test Plan	Release Date	July 30 th , 2016	Print Date	July 30 th , 2016

3.3 Class PatientController

3.3.1 Unit Test Case (UTC-09): getPatientList() : ArrayList

Description: Test getPatientList() method for checking whether the method get right list of patient on the web application. The expected result will be arraylist of patient.

Prerequisites or Test input: The test data is available at Appendix A.

Test cases:

Test case ID	Description	Input	Expected Result
1	The method should return the right arraylist of patient from the database.	-	<pre> ArrayList<Patient>{ Patient{ personal_id = 1719900241047, name = "Somkiat", surname = "Warahala", prescription = "Paracetamal 500ml.", create_by = 31, username = "somkiat", password = "54139", create_at = 2016-07-31 18:36:28, update_at = 2016-07-31 18:36:28, } Patient{ personal_id = 1769900241047, name = "Dangdee", surname = "Rakna", prescription = "Vitamin C 90 ml", create_by = 32 username = "dang", password = "67045", create_at = 2016-07-30 23:55:17, update_at = 2016-07-30 23:59:23, } Patient{ personal_id = 1660100485726, name = "Vikom", surname = "Chomjai", prescription = "Dextrometrophan", create_by = 32, username = "vikom", password = "58706", create_at = 2016-08-01 03:39:11, update_at = 2016-08-01 03:39:11, } } </pre>

3.3.2 Unit Test Case (UTC-10): viewPatient(Int personal_id) : Mixed

Description: Test viewPatient(Int personal_id) method for checking whether the method get right patient model object related to personal id. The expected result will be patient model object.

Prerequisites or Test input: The test data is available at Appendix A.

Test cases:

Test case ID	Description	Input	Expected Result
1	Test method by input personal id that exist in the database. The method should return the right patient object related to personal id.	personal_id = 1719900241047	Patient{ personal_id = 1719900241047, name = "Somkiat", surname = "Warahala", prescription = "Paracetamal 500ml.", create_by = 31, username = "somkiat", password = "54139", create_at = 2016-07-31 18:36:28, update_at = 2016-07-31 18:36:28 }
2	Test method by input personal id that not exist in the database	int personal_id = 111111111111	False
3	Test method by not input personal id.	Null	False
4	Test method by input personal id with string value.	string personal_id = "personal id"	False

Document Type	Test Plan	Release Date	July 30 th , 2016	Print Date	July 30 th , 2016

3.3.3 Unit Test Case (UTC-11): createPatient(Patient patient) : Boolean

Description: Test createPatient(Patient patient) method for checking whether the method add the right data into the database. The data includes personal id, name, surname, prescription, and username.

Prerequisites or Test input: The test data is available at Appendix A.

Test cases:

Test case ID	Description	Input	Expected Result
1	Test method by input new data.	Patient{ personal_id = 1660100485726, name = "Vikom", surname = "Chomjai", prescription = "Paracetamal 500ml.", username = "vikom", }	True
2	Test method by input the data that already exist. (personal id)	Patients{ personal_id = 1660100485726 name = "Mana", surname = "Sornjai", prescription = "Aspirin 75ml.", username = "mana", }	False
3	Test method by input the data that already exist. (username)	Patients{ personal_id = 1660100485726, name = "Mana", surname = "Sornjai", prescription = "Aspirin 750ml.", username = "vikom", }	False
4	Test method by input without personal id.	Patients{ personal_id = Null, name = "Vikom", surname = "Chomjai", prescription = "Paracetamal 500ml.", username = "vikom", }	False
5	Test method by input without name.	Patients{ personal_id = 1660100485726, name = Null, surname = "Chomjai", prescription = "Paracetamal 500ml.", username = "vikom", }	False

Document Name	Smart Prescription Application_Test Plan	Owner	Natthakan Kaeokanpai, Phithiwat Sitthitun	Page	18
Document Type	Test Plan	Release Date	July 30 th , 2016	Print Date	July 30 th , 2016

6	Test method by input without surname.	Patient{ personal_id = 1660100485726, name = "Vikom", surname = Null, prescription = "Paracetamal 500ml.", username = "vikom", }	False
7	Test method by input without prescription.	Patient{ personal_id = 1660100485726, name = "Vikom", surname = "Chomjai", prescription = Null, username = "vikom", }	Fasle
8	Test method by input without username.	Patients{ personal_id = 1660100485726, name = "Vikom", surname = "Chomjai", prescription = "Paracetamal 500ml.", username = Null, }	False
9	Test method by input string.	"test"	False
10	Test method by input empty string.	""	Flase
11	Test method by input an integer.	123	False
12	Test method by nothing input data.	Null	False

Document Name	Smart Prescription Application_Test Plan	Owner	Natthakan Kaeokanpai, Phithiwat Sitthitun	Page	19
Document Type	Test Plan	Release Date	July 30 th , 2016	Print Date	July 30 th , 2016

3.3.4 Unit Test Case (UTC-12): updatePatient(Patient patient) : Boolean

Description: Test updatePatient(Patient patient) method for checking whether the method update the right data into the database. The data includes personal id, name, surname, prescription, and username.

Prerequisites or Test input: The test data is available at Appendix A.

Test cases:

Test case ID	Description	Input	Expected Result
1	Test method by input new data.	Patient{ personal_id = 1660100485726, name = "Vikom", surname = "Chomjai", prescription = "Paracetamal 500ml. Multivitamin, B Complex", username = "vikom", }	True
2	Test method by input the data that already exist. (personal id)	Patient{ personal_id = 1660100485726, name = "Vikom", surname = "Chomjai", prescription = "Paracetamal 500ml. Multivitamin, B Complex", username = "vikom", }	False
3	Test method by input the data that already exist. (username)	Patient{ personal_id = 1660100485726, name = "Vikom", surname = "Chomjai", prescription = "Paracetamal 500ml. Multivitamin, B Complex", username = "somkiat", }	False
4	Test method by input without personal id.	Patient{ personal_id = Null, name = "Vikom", surname = "Chomjai", prescription = "Paracetamal 500ml. Multivitamin, B Complex", username = "vikom", }	False
5	Test method by input without name.	Patient{ personal_id = 1660100485726, name = Null, surname = "Chomjai", prescription = "Paracetamal 500ml. Multivitamin, B Complex", username = "vikom", }	False

Document Name	Smart Prescription Application_Test Plan	Owner	Natthakan Kaeokanpai, Phithiwat Sitthitun	Page	20
Document Type	Test Plan	Release Date	July 30 th , 2016	Print Date	July 30 th , 2016

6	Test method by input without surname.	Patient{ personal_id = 1660100485726, name = "Vikom", surname = Null, prescription = "Paracetamal 500ml., Multivitamin, B Complex", username = "vikom", }	False
7	Test method by input without prescription.	Patient{ personal_id = 1660100485726, name = "Vikom", surname = "Chomjai", prescription = Null, username = "vikom", }	Fasle
8	Test method by input without username.	Patient{ personal_id = 1660100485726, name = "Vikom", surname = "Chomjai", prescription = "Paracetamal 500ml., Multivitamin, B Complex", username = Null, }	False
9	Test method by input string.	"test"	False
10	Test method by input empty string.	""	Flase
11	Test method by input an integer.	123	False
12	Test method by nothing input data.	Null	False

Document Name	Smart Prescription Application_Test Plan	Owner	Natthakan Kaeokanpai, Phithiwat Sitthitun	Page	21
Document Type	Test Plan	Release Date	July 30 th , 2016	Print Date	July 30 th , 2016

3.3.5 Unit Test Case (UTC-13): deletePatient(Int personal_id) : Boolean

Description: Test deletePatient(Int personal_id) method for checking whether the method delete the patient from the database.

Prerequisites or Test input: The test data is available at Appendix A.

Test cases:

Test case ID	Description	Input	Expected Result
1	Test method by input personal id that exist in the database.	personal_id = 179900241047	True
2	Test method by input user id that not exist in the database.	personal_id = 1234567890987	False

3.3.6 Unit Test Case (UTC-14): searchPatient(String patients) : ArrayList

Description: Test searchPatient(String patients) method for checking whether the method can search the patient from the patient table in the database by using personal id, name or surname. The expected result will be arraylist of patient.

Prerequisites or Test input: The test data is available at Appendix A.

Test cases:

Test case ID	Description	Input	Expected Result
1	Test method by input personal id that exist in the patient table.	patients = "1660100485726"	ArrayList<Patient>{ Patient{ personal_id = 1660100485726 name = "Vikom", surname = "Chomjai", prescription = "Dextrometorphane", create_by = 32 username = "vikom", password = "58706", create_at = 2016-08-01 03:39:11 update_at = 2016-08-01 03:39:11 } }
2	Test method by input name that exist in the user table.	patients = "Somkiat"	ArrayList<Patient>{ Patient{ personal_id = 1719900241047 name = "Somkiat", surname = "Warahala", prescription = "Paracetamol 500ml.", create_by = 31 username = "somkiat", password = "54139", create_at = 2016-07-31 18:36:28 update_at = 2016-07-31 18:36:28 } }

Document Name	Smart Prescription Application_Test Plan	Owner	Natthakan Kaeokanpai, Phithiwat Sitthitun	Page	22
Document Type	Test Plan	Release Date	July 30 th , 2016	Print Date	July 30 th , 2016

3	Test method by input surname that exist in the user table	patients = "Rakna"	<pre> ArrayList<Patient>{ Patient{ personal_id = 1769900241047 name = "Dangdee", surname = "Rakna", prescription = "Vitamin C 90 ml", create_by = 32 username = "dang", password = "67045", create_at = 2016-07-30 23:55:17 update_at = 2016-07-30 23:59:23 } } </pre>
4	Test method by input empty data.	patients = ""	<pre> ArrayList<Patient>{ Patient{ personal_id = 1719900241047, name = "Somkiat", surname = "Warahala", prescription = "Paracetamal 500ml.", create_by = 31, username = "somkiat", password = "54139", create_at = 2016-07-31 18:36:28, update_at = 2016-07-31 18:36:28, } Patient{ personal_id = 1769900241047, name = "Dangdee", surname = "Rakna", prescription = "Vitamin C 90 ml", create_by = 32 username = "dang", password = "67045", create_at = 2016-07-30 23:55:17, update_at = 2016-07-30 23:59:23, } Patient{ personal_id = 1660100485726, name = "Vikom", surname = "Chomjai", prescription = "Dextrometrophan", create_by = 32, username = "vikom", password = "58706", create_at = 2016-08-01 03:39:11, update_at = 2016-08-01 03:39:11, } } </pre>

Document Name	Smart Prescription Application_Test Plan	Owner	Natthakan Kaeokanpai, Phithiwat Sitthitun	Page	23
Document Type	Test Plan	Release Date	July 30 th , 2016	Print Date	July 30 th , 2016

5	Test method by input data does not exist in the patient table.	patients = "qwert"	Null
---	--	--------------------	------

3.4 Class AllergyController

3.4.1 Unit Test Case (UTC-15): getAllergyList() : ArrayList

Description: Test getAllergyList() method for checking whether the method get right list of allergy report on the web application. The expected result will be arraylist of allergy.

Prerequisites or Test input: The test data is available at Appendix A.

Test cases:

Test case ID	Description	Input	Expected Result
1	The method should return the right arraylist of allergy report from the database.	-	<pre> ArrayList<Allergy>{ Allergy{ allergy_id = 8, personal_id = 1759900241047, name = "Phithiwat", surname = "Sitthitun", allergy_drug = "Pyramidone, co-trimoxazole, aspirin", reporter = 32, create_at = 2016-07-30 04:15:11, update_at = 2016-07-31 04:42:21, } Allergy{ allergy_id = 10, personal_id = 1600100485726, name = "Natthakan", surname = "Kaeokanpai", allergy_drug = "Vitamin C", reporter = 32, create_at = 2016-07-31 04:20:43, update_at = 2016-07-31 04:20:43, } Allergy{ allergy_id = 11, personal_id = 1779900241047, name = "Somjai", surname = "Ngaila", allergy_drug = "Multivitamins", reporter = 31, create_at = 2016-07-31 18:47:11, update_at = 2016-07-31 18:47:11, } } </pre>

Document Name	Smart Prescription Application_Test Plan	Owner	Natthakan Kaeokanpai, Phithiwat Sitthitun	Page	24
Document Type	Test Plan	Release Date	July 30 th , 2016	Print Date	July 30 th , 2016

3.4.2 Unit Test Case (UTC-16): viewAllergy(Int allergy_id) : Mixed

Description: Test viewAllergy(Int allergy_id) method for checking whether the method get right allergy model object related to allergy id. The expected result will be allergy model object.

Prerequisites or Test input: The test data is available at Appendix A.

Test cases:

Test case ID	Description	Input	Expected Result
1	Test method by input allergy id that exist in the database. The method should return the right allergy object related to allergy id.	int allergy_id = 11	Allergy{ allergy_id = 11, personal_id = 1779900241047, name = "Somjai", surname = "Ngaila", allergy_drug = "Multivitamins", reporter = 31, create_at = 2016-07-31 18:47:11, update_at = 2016-07-31 18:47:11 }
2	Test method by input allergy id that not exist in the database	int allergy_id = 99	False
3	Test method by not input allergy id.	Null	False
4	Test method by input allergy id with string value.	string allergy_id = "allergyid"	False

Document Name	Smart Prescription Application_Test Plan	Owner	Natthakan Kaeokanpai, Phithiwat Sitthitun	Page	25
Document Type	Test Plan	Release Date	July 30 th , 2016	Print Date	July 30 th , 2016

3.4.3 Unit Test Case (UTC-17): getAllergyList2() : ArrayList

Description: Test getAllergyList2() method for checking whether the method get right list of allergy report on the web application. The expected result will be arraylist of allergy.

Prerequisites or Test input: The test data is available at Appendix A.

Test cases:

Test case ID	Description	Input	Expected Result
1	The method should return the right arraylist of allergy report from the database.	-	<pre>ArrayList<Allergy>{ Allergy{ allergy_id = 8, personal_id = 1759900241047, name = "Phithiwat", surname = "Sithhitun", allergy_drug = "Pyramidone, co-trimoxazole, aspirin", reporter = 32, create_at = 2016-07-30 04:15:11, update_at = 2016-07-31 04:42:21 } Allergy{ allergy_id = 10, personal_id = 1600100485726, name = "Natthakan", surname = "Kaeokanpai", allergy_drug = "Vitamin C", reporter = 32, create_at = 2016-07-31 04:20:43, update_at = 2016-07-31 04:20:43 } Allergy{ allergy_id = 11, personal_id = 1779900241047, name = "Somjai", surname = "Ngaila", allergy_drug = "Multivitamins", reporter = 31, create_at = 2016-07-31 18:47:11, update_at = 2016-07-31 18:47:11, } }</pre>

Document Type	Test Plan	Release Date	July 30 th , 2016	Print Date	July 30 th , 2016

3.4.4 Unit Test Case (UTC-18) viewAllergy2(Int allergy_id) : Mixed

Description: Test viewAllergy2(Int allergy_id) method for checking whether the method get right allergy model object related to allergy id. The expected result will be allergy model object.

Prerequisites or Test input: The test data is available at Appendix A.

Test cases:

Test case ID	Description	Input	Expected Result
1	Test method by input allergy id that exist in the database. The method should return the right allergy object related to allergy id.	allergy_id = 8	Allergy{ allergy_id = 8, personal_id = 1759900241047, name = "Phithiwat", surname = "Sitthitun", allergy_drug = "Pyramidone, co-trimoxazole, aspirin", reporter = 32, create_at = 2016-07-30 04:15:11, update_at = 2016-07-31 04:42:21, }
2	Test method by input allergy id that not exist in the database	allergy_id = 00	False
3	Test method by not input allergy id.	Null	False
4	Test method by input allergy id with string value.	allergy_id = "allergyreport"	False

Document Name	Smart Prescription Application_Test Plan	Owner	Natthakan Kaeokanpai, Phithiwat Sitthitun	Page	27
Document Type	Test Plan	Release Date	July 30 th , 2016	Print Date	July 30 th , 2016

3.4.5 Unit Test Case (UTC-19): createAllergy(Allergy allergy) : Boolean

Description: Test createAllergy(Allergy allergy) method for checking whether the method add the right data into the database. The data includes personal id, name, surname, and allergy drugs.

Prerequisites or Test input: The test data is available at Appendix A.

Test cases:

Test case ID	Description	Input	Expected Result
1	Test method by input new data.	Allergy{ personal_id = 1600100485726, name = "Natthakan", surname = "Kaeokanpai", allergy_drug = "Vitamin C", }	True
2	Test method by input the data that already exist. (personal id)	Allergy{ personal_id = 1600100485726, name = "Phithiwat", surname = "Sittitun", allergy_drug = "Pyramidone, Co-Trimoxazole, Aspirin", }	False
3	Test method by input without personal id.	Allergy{ personal_id = Null, name = "Natthakan", surname = "Kaeokanpai", allergy_drug = "Vitamin C", }	False
4	Test method by input without name.	Allergy{ personal_id = 1600100485726, name = Null, surname = "Kaeokanpai", allergy_drug = "Vitamin C", }	False
5	Test method by input without surname.	Allergy{ personal_id = 1600100485726, name = "Natthakan", surname = Null, allergy_drug = "Vitamin C", }	False
6	Test method by input without allergy drug.	Allergy{ personal_id = 1600100485726 name = "Natthakan", surname = "Kaeokanpai", allergy_drug = Null }	False
7	Test method by input string.	"Allergy"	False
8	Test method by input empty string.	" "	False

Document Name	Smart Prescription Application_Test Plan	Owner	Natthakan Kaeokanpai, Phithiwat Sittitun	Page	28
Document Type	Test Plan	Release Date	July 30 th , 2016	Print Date	July 30 th , 2016

9	Test method by input an integer.	500	False
10	Test method by nothing input data.	Null	False

3.4.6 Unit Test Case (UTC-20): updateAllergy(Allergy allergy) : Boolean

Description: Test updateAllergy(Allergy allergy) method for checking whether the method update the right data into the database. The data includes personal id, name, surname, and allergy drug.

Prerequisites or Test input: The test data is available at Appendix A.

Test cases:

Test case ID	Description	Input	Expected Result
1	Test method by input new data.	Allergy{ personal_id = 1600100485726, name = "Natthakan", surname = "Kaeokanpai", allergy_drug = "Vitamin C, Multivitamins", }	True
2	Test method by input the data that already exist. (personal id)	Allergy{ personal_id = 1759900241047, name = "Natthakan", surname = "Kaeokanpai", allergy_drug = "Vitamin C, Multivitamins", }	False
3	Test method by input without personal id.	Allergy{ personal_id = Null, name = "Natthakan", surname = "Kaeokanpai", allergy_drug = "Vitamin C, Multivitamins", }	False
4	Test method by input without name.	Allergy{ personal_id = 1600100485726, name = Null, surname = "Kaeokanpai", allergy_drug = "Vitamin C, Multivitamins", }	False

Document Name	Smart Prescription Application_Test Plan	Owner	Natthakan Kaeokanpai, Phithiwat Sitthitun	Page	29
Document Type	Test Plan	Release Date	July 30 th , 2016	Print Date	July 30 th , 2016

5	Test method by input without surname.	Allergy{ personal_id = 1600100485726, name = "Natthakan", surname = Null, allergy_drug = "Vitamin C", }	False
6	Test method by input without allergy drug.	Allergy{ personal_id = 1600100485726 name = "Natthakan", surname = "Kaeokanpai", allergy_drug = Null }	False
7	Test method by input string.	"Allergy"	False
8	Test method by input empty string.	" "	False
9	Test method by input an integer.	500	False
10	Test method by nothing input data.	Null	False

3.4.7 Unit Test Case (UTC-21): deleteAllergy(Int allergy_id) : Boolean

Description: Test deleteAllergy(Int allergy_id) method for checking whether the method delete the allergy from the database.

Prerequisites or Test input: The test data is available at Appendix A.

Test cases:

Test case ID	Description	Input	Expected Result
1	Test method by input allergy id that exist in the database.	allergy_id = 8	True
2	Test method by input allergy id that not exist in the database.	allergy_id = 789	False

Document Name	Smart Prescription Application_Test Plan	Owner	Natthakan Kaeokanpai, Phithiwat Sitthitun	Page	30
Document Type	Test Plan	Release Date	July 30 th , 2016	Print Date	July 30 th , 2016

3.4.8 Unit Test Case (UTC-22): searchAllergy(String allergies) : ArrayList

Description: Test searchAllergy(String allergies) method for checking whether the method can search the allergy report from the allergy table in the database by using personal id, name or surname. The expected result will be arraylist of allergy report.

Prerequisites or Test input: The test data is available at Appendix A.

Test cases:

Test case ID	Description	Input	Expected Result
1	Test method by input personal id that exist in the allergy table.	allergies = "1759900241047"	ArrayList<Allergy>{ Allergy{ allergy_id = 8 personal_id = 1759900241047 name = "Phithiwat", surname = "Sitthitun", allergy_drug = "Pyramidone, co-trimoxazole, aspirin", reporter = 32 create_at = 2016-07-30 04:15:11 update_at = 2016-07-31 04:42:21 } }
2	Test method by input name that exist in the user table.	allergies = "Somjai"	ArrayList<Allergy>{ Allergy{ allergy_id = 11 personal_id = 1779900241047 name = "Somjai", surname = "Ngaila", allergy_drug = "Multivitamins", reporter = 31 create_at = 2016-07-31 18:47:11 update_at = 2016-07-31 18:47:11 } }
3	Test method by input surname that exist in the user table	allergies = "Kaeokanpai"	ArrayList<Allergy>{ Allergy{ allergy_id = 10 personal_id = 1600100485726 name = "Natthakan", surname = "Kaeokanpai", allergy_drug = "Vitamin C", reporter = 32 create_at = 2016-07-31 04:20:43 update_at = 2016-07-31 04:20:43 } }

3.5 Class LoginEventManager

3.5.1 Unit Test Case (UTC-23): Login() : void

Description: Test for check evaluation result of procedure when the user login to the system, the system will return ['status'] = 1 when user login by input both username and password in the text field and return ['status'] = 0 when user login only username or password or did not input both of username and password.

Test cases:

Test case ID	Description	Input	Expected Result
1	Test method Login() by input a username and password.	username = "username"; password = "password";	['status'] = 1
2	Test method Login() by input a username without password.	username = "username"; password = Null	['status'] = 0
3	Test method Login() by input a password without username.	username = Null password = "password";	['status'] = 0
4	Test method Login() by input a username and password.	username = Null password = Null	['status'] = 0

3.6 Class PreferencesManager

3.6.1 Unit Test Case (UTC-24): getUserInformation() : UserInformationModel

Description: Test for check the result of getUserInformation () that can get the information by the result will be not Null.

Test cases:

Test case ID	Description	Input	Expected Result
1	Test method getUserInformation() that can get the information by input UserInformationModel.	UserInformationModel	UserInformationModel is not Null

Document Name	Smart Prescription Application_Test Plan	Owner	Natthakan Kaeokanpai, Phithiwat Sitthitun	Page	33
Document Type	Test Plan	Release Date	July 30 th , 2016	Print Date	July 30 th , 2016

3.7 Class QRCodeEncoder

3.7.1 Unit Test Case (UTC-25): encode(String contents, BarcodeFormat format, int width, int height): BitMatrix

Description: Test for check the method encode() can input the value and then return the same input value by input .

Test cases:

Test case ID	Description	Input	Expected Result
1	Test method encode() that can return the same value by input the value (String = "contents", BarcodeFormat = "format", int = "9",int = "9")	BitMatrix {String = "contents", BarcodeFormat = "format", int = "9",int = "9"}	BitMatrix {contents = "contents", BarcodeFormat = "format", int = "9",int = "9"}

Chapter Four | System Testing

System Test Case (STC-01): Doctors can view a doctor home page on the web application.

Test Description	This test case is a system testing for URS-01. Doctors view a doctor home page on the web application.
Prerequisite	Doctor must login.
Prepared Data	The system prepare the information from the database which includes position, name, surname and username.
Test Steps	1. Doctor selects to “Home” on menu bar.
